INTRODUCTION

The document below is a blueprint of the fund finder report. The EVAMAX Team will compile information regarding funding programs which are pertinent to your specific case. The grant report is organized into different groups or buckets of funding such as: HIRING & TRAINING, INNOVATION, CAPACITY EXPANSION, EXPORTS, CLEAN TECH & SPECIALTY GRANTS. Grants are prioritized based on current client requirements and program deadlines.

Within each program, salient features regarding the eligibility criteria, funding amounts, the cost-sharing agreement and the application deadlines, intake windows, contacts etc. will be highlighted.

Funding Strategy:

Based on initial Client Consultation, if any immediate application to be pursued is identified, it will be indicated on the report. Additional comments and program information will be added where-ever applicable.
